

FULL POWER FOR YOUR PHOTOVOLTAIC POWER PLANT

WITH OPERATIONS & MAINTENANCE BY GREENTECH

OPERATIONS &
MAINTENANCE.
WITH SUBSTANCE.

WWW.GREENTECH.ENERGY

OPERATIONS & MAINTENANCE AS IT SHOULD BE ...

... or as we say: with substance! We are dedicated operators of photovoltaic systems with extensive experience and comprehensive expertise. Our vision is to create a life-friendly future powered by green energy. We are committed to this vision and work every day with great passion to ensure your power-plants performs at its best, reliably producing green electricity for many years to come.

MODULAR AND CUSTOMISED:

- Professional monitoring with secure, EPCIP-compliant and GDPR-compliant connections, fast response times, and data-based analyses
- Comprehensive plant and incident management with consistent contract, warranty, and insurance management
- Inspection, maintenance, and testing with digital data collection and comprehensive reporting
- Regular reporting on events and yields, along with recommendations for plant optimisation
- Additional services for operations and performance enhancement from a single source

EXPERTLY TAKEN CARE OF

- ◆ We offer personalized advice on all aspects of plant operations. Our services are tailored to meet the specific needs of your PV system.
- ◆ Your dedicated operations management teams know your system inside out and have an overview of all aspects of plant management.
- ◆ We instantly identify underperformance and optimisation potential using professional monitoring and in-depth data and performance analyses.
- ◆ We keep you up to date on your plant performance with regular and informative reports.

ON THE SAFE SIDE

- ◆ As the team responsible for the system, we ensure safe operation and minimise your operator risk.
- ◆ As a registered specialist electrical company, we place great value on high safety standards.
- ◆ For maximum data security, we rely on modern and robust IT solutions with EPCIP and GDPR-compliant connections and controls.

IDENTIFY OPTIMIZATION POTENTIAL NOW AND CHANGE TO AN O&M SPECIALIST!

IN THE BEST OF HANDS

- ◆ We have been managing photovoltaic systems at the highest level since 2008.
- ◆ We have extensive experience with PV plants of all types and ages.
- ◆ We combine proven methods with the latest trends to maximize yields and ensure the longevity of your system.
- ◆ We offer comprehensive PV operations and maintenance expertise under one roof: with our own control centre, effective system landscape and our own engineering department.

INTEGRATED AND CUSTOMISED

Are you looking for a holistic management approach and customised solutions for your asset - over the entire service life of the system? Then you've come to the right place! We continuously monitor all the unique aspects of your plant, identifying optimization opportunities that go beyond just technical operations. By doing so, we guarantee optimal system performance at all times and in every scenario.

In addition to Operations and Maintenance, we offer related services in the following areas:

Asset-Management

- Cash Management
- Controlling
- Financial Accounting
- Administration
- Contract Management
- Risk Management

Engineering Services

- Site Analysis
- Initial Plant Design and Execution Planning
- Yield Simulation and Assessment
- Technical Due Diligence
- Tender Management
- Grid Connection Design
- Communication and Control Solutions
- Supervision of Construction and Acceptance
- Repowering of Modules and Inverters

An aerial photograph of a large industrial facility with a vast array of solar panels covering the roof. The building is surrounded by greenery and parking areas with some trucks. In the background, a city skyline is visible under a clear sky.

GREENTECH AS
A PARTNER FOR
DEVELOPMENT,
CONSTRUCTION
AND OPERATION.

greentech is an integrated photovoltaic specialist: The range of services includes project development, plant design, construction and operational management of photovoltaic power plants in selected European markets. greentech offers further services in the fields of quality assurance, yield maximisation, financing and electricity marketing. With an interdisciplinary team of around 200 people at several locations in Germany, UK, Ireland and Italy, greentech is active in ten countries. In the technical and commercial asset management, we offer a full-service operational management concept for plants of all sizes and ages and manage a portfolio of more than 1 GWp.
